Nevasa monitorea alrededor de 1800 ETFs de todos los emisores, focalizándose en cada momento, en los cien ETFs de mayor AUM (montos de activos administrados).

Si bien los ETFs constituyen una muestra pequeña de las inversiones globales, tienen la virtud de, por un lado, detectar el apetito de los inversores, y por el otro, de ser útiles para la toma de decisiones puesto que los datos de flujos están disponible casi en tiempo real, con muy poco rezago.

Este documento y su contenido no constituyen una oferta o una solicitud de compra o de suscripción de ningún valor u otro instrumento, o de realizar una inversión, sino que tiene un propósito meramente informativo. Por ello, la información contenida en este documento no corresponde a objetivos de inversión específicos, situación financiera o necesidades particulares de ningún receptor del mismo. Antes de realizar cualquier inversión, los inversionistas deberán informarse sobre las condiciones de la operación, así como de los derechos, riesgos y responsabilidades implícitas en ella. Por lo que Negocios y Valores S.A. no asume responsabilidad alguna, ya sea directa o indirecta, derivada del uso de este documento o su contenido. Cualquier opinión expresada en este material está sujeta a cambios sin previo aviso de Negocios y Valores S.A., quien no asume la obligación de actualizar la información contenida en él. Negocios y Valores S.A. o cualquiera de sus relacionados, vendedores, agentes u otros empleados podrán hacer comentarios de mercado, orales o escritos, o transacciones que reflejen una opinión contraria a aquéllas expresadas en el presente documento.
